

I drive a truck for a living, xm radio is a tool I use to get local up-to-date traffic and weather information on large metro areas in which I operate. I run in and out of areas of new york city,newark,nj,baltimore,washington,dc,philadelphia,harrisburg,pa and Boston, MA. Knowing what the traffic is doing before I get to one of these area's can make a difference on delivery times avoiding the area or just plain staying out of harms way, This service not only tells me what the traffic and weather is doing but also what and where road construction is taking place. This is very help full when doing moving construction zones .I have yet to find any other station that will cover this as well as XM does. This keeps the public safer as well as avoids head aches I cannot get this service any where's else. I am also kept in formed on current event thru the news, weather and sports channels offered by XM RADIO. This makes me a safer drive by keeping my hands off the radio controls and focused on driving. I don't have to search for a new station. Once you set your station you never have to change them. I can listen to anything from talk radio, music, comedy, drama,, weather, and the list goes on and on. Over 100 stations of coast to coast entertainment and up-to-date traffic and weather.

I could do my job without XM'S traffic and weather, but this keeps me much more informed on the current conditions in most of the area I operate in.

This is also a service that I pay a monthly service fee for and does not come over clear channel Broadcast . So unless you subscribe to XM Radio you will not get this service. The national association of broadcasters (NAB) is trying to lobby to remove my right to chose what I listen to. Proposed bill HR 6026 would do just that .Please don?t take this away from me

Thank you for your time
